### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## OFFICE ACTION

### *Election/Restriction*

1. This invention application contains claims directed to four patentably distinct species:

Group A (1-2, 4-7): A method for making electrical interconnection [class 438, subclass 117];

Group B (3): A leadframe of an electronic device [class 257, subclass 674];

Group C (8): A connector or socket of an electronic device [class 257, subclass 773];

Group D (9-12): A method for making electrical interconnection with connecting elements [class 438, subclass 123].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicant must choose one species from each of Groups A thru D, because of the following reasons:

- 1) Group A compared to Group B: Its leads are not necessarily twisted.
- 2) Group A compared to Group C: Leads vs. a connector or socket comprising contact springs.
- 3) Group A compared to Group D: It does not have connecting elements comprising means to prevent any materials from migrating away from joints.
- 4) Group B compared to Group C: A leadframe vs. a connector or socket comprising contact springs.
- 5) Group B compared to Group D: It does not have connecting elements at all.
- 6) Group C compared to Group D: It does not have connecting elements at all.

Examiner also notes that claim 8 of Group C related to socket (or connector) does not have any connection with the scope of the invention.

2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a)

3. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in.

Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement is traversed (37CFR 1.143).
